

KarmaBite

Connecting Kindness, One Meal at a Time.

Hackathon Pitch Presentation

The Disconnect in Our Food System

Nearly **40%** of all food in India goes to waste every year.

On one hand, surplus food from events, restaurants, and homes is discarded. On the other, millions go hungry.

This is a problem of information, not just scarcity.

Our Solution: KarmaBite

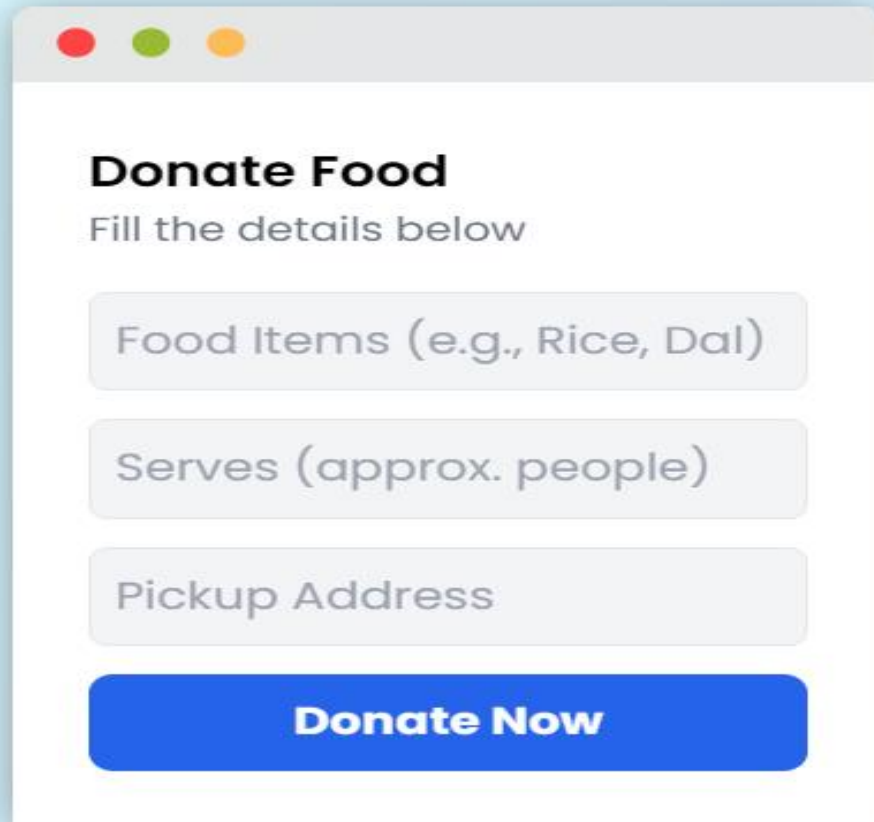

A **hyperlocal, real-time** food donation platform that directly connects donors with those in need.

No complexity. Just a simple, effective bridge.

See It In Action: Real-Time Sync

1. The Donor

A mockup of a web interface for donors. It features a light gray header with three colored window control buttons (red, green, orange). The main content area is white and contains the title 'Donate Food', a subtitle 'Fill the details below', and three stacked text input fields with placeholder text: 'Food Items (e.g., Rice, Dal)', 'Serves (approx. people)', and 'Pickup Address'. At the bottom is a prominent blue button with the text 'Donate Now'.

Donate Food
Fill the details below

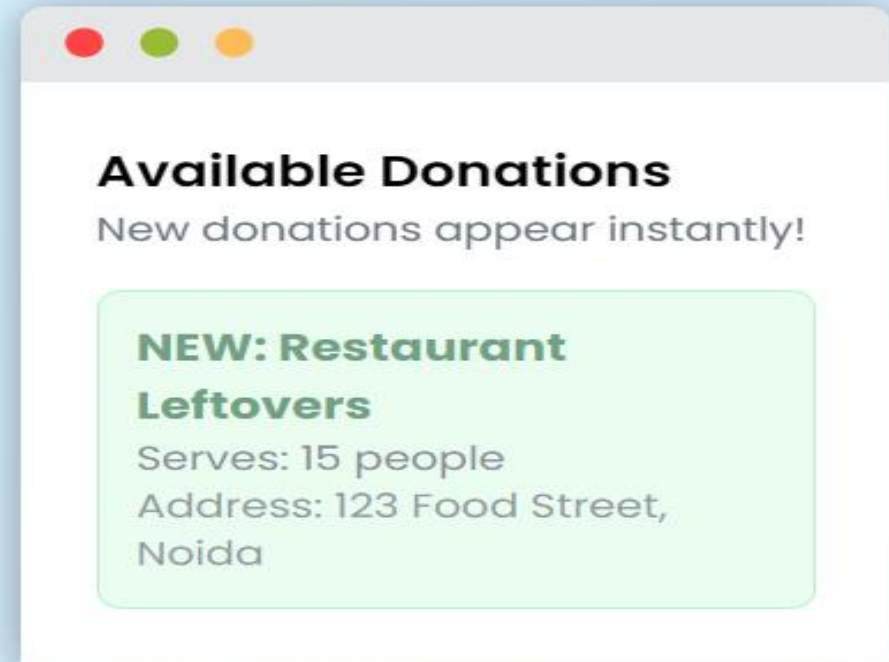

Food Items (e.g., Rice, Dal)

Serves (approx. people)

Pickup Address

Donate Now

2. The Receiver (NGO)

A mockup of a web interface for NGOs. It features a light gray header with three colored window control buttons (red, green, orange). The main content area is white and contains the title 'Available Donations' and a subtitle 'New donations appear instantly!'. Below this is a green-bordered box containing a new donation entry with the title 'NEW: Restaurant Leftovers', the text 'Serves: 15 people', and the text 'Address: 123 Food Street, Noida'.

Available Donations
New donations appear instantly!

NEW: Restaurant Leftovers
Serves: 15 people
Address: 123 Food Street, Noida

How We Built It

Frontend

HTML5

CSS3

JS

Simple, fast, and
effective.

Backend & DB

Firebase

Real-time data with
Firestore & Secure Auth.

Our Vision: A Movement, Not Just an web

NGO Verification

Ensuring food reaches certified organizations.

Rating System

Building trust and accountability in the community.

Gamification

"Green Hero" badges to reward frequent donors.

**The best use of technology is to solve
society's most pressing problems.**

One small act can create a big impact.

Thank You.
